

UNLOCKING POTENTIAL: SOLUTIONS FOR TODAY'S EU YOUTH CHALLENGES

YOUTH'S CHALLENGES:

Needs

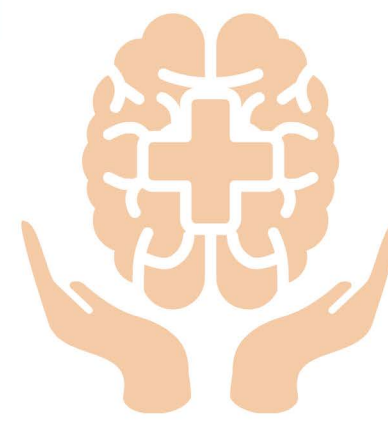

Information on how young people can become active citizens (volunteering and job opportunities) because not a lot of people are interested or they do not know how to look for this kind of opportunities.

Problems

Fear that university degrees are not enough anymore to enter the labour market, low salaries due to inflation, housing, lack of opportunities

SOLUTIONS FOR OVERCOMING THESE CHALLENGES:

Skills acquisition

Promote properly additional ways of education (volunteering, participation in local events, discussion forums, debates) in order for people to be equipped with skills (mostly soft skills) that are not taught in class.

Active citizenship

Promote through social media in a more interesting and eye-catching way what active citizenship and participation is to attract more people

THESE DATA ARE RESULTS FROM DEBATE FORUMS HELD WITHIN THE PROJECT.
